

paraDATA

Agent

An off-site backup solution with secondary replication "ready to go"

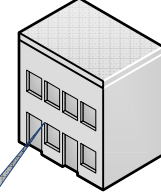

paraDATA client runs on internal network servers/workstations backing up data to our remote paraDATA Server.

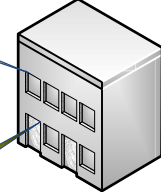

Customers have the option to have their data replicated to a second paraDATA server located hundreds of miles from the primary paraDATA server.

Proxurve Solutions NOC

St. Louis, MO

Proxurve Solutions NOC

733 W. Henry Indianapolis, IN

Data from each paraDATA client (server/workstation) is encrypted and then transmitted via the Internet to one of our paraDATA servers in our Tier 4 Level NOC.
